How does Extra Vote work?

 Rating 73% (14 Votes)

Created on Wednesday, 24 September 2008 18:37

The very first time Extra Vote Plugin is runned in your site, it will create a new database table for your system to store those extra content ratings.

	content_id	extra_id	lastip	rating_sum	rating_count
<input type="checkbox"/>	1	1		10	2
<input type="checkbox"/>	1	2		5	1
<input type="checkbox"/>	2	1		5	1
<input type="checkbox"/>	2	2		4	1

The content_id field will be filled with your article id, and the extra_id field, with the # you write in the {extravote #} code.

Extra Vote will work properly as long as you don't repeat that # number in the same article.

The main content rating behaves just like the core, but the

 Rating 73% (14 Votes)

Linux

code is also there to allow you to display the stars anywhere else inside of your article

Both {extravote #} and

features can be disabled in order to optimize it in case you just want to use this plugin for your main content rating

Parameters

▼ Plugin Parameters	
Main Content Rating	afterTitle
Counter	Show all
Show/Hide (0 Votes)	<input checked="" type="radio"/> Show <input type="radio"/> Hide
{extravote #} Code	Don't use
{mainvote} Code	Don't use
Call ExtraVote Style	<input type="radio"/> No <input checked="" type="radio"/> Yes

Tip: if you add the styles from extravote.css to your template.css, then you can choose not to Call ExtraVote Style in order to lighten your website, too.
